

How to Set a Trailing Stop on MT4

1. Go to the **Terminal** window, navigate to the **Trade** tab then right click on the order row for which you wish to set a Trailing Stop.
2. Select **Trailing Stop** in the menu that appears. This will display a drop-down menu where you can select the number of points you want to set (10 points = 1 pip).

3. The **Trailing Stop** drop-down menu also contains the **Custom...** menu option. When you select this, you can enter a specific number of points in the Custom window.
